

English Martyrs Catholic Voluntary Academy

We grow and learn, with the gifts we have been given, following in the footsteps of Jesus.

Design and Technology Progression Map

Intent: Following the national curriculum for Design and Technology, our intent is that all our children: -

- Research existing products, have opportunities to develop purposeful drawing and design skills to design a new product for a specific purpose based on their research, have opportunities to make their product, using modelling and prototypes to develop their design, be able to critically evaluate their finished product.
- Foster a love of learning new knowledge and skills, a love of building on existing knowledge and skills and a love of creating, planning and undertaking the design process, methodically.
- To understand that 'something' is made for 'somebody' for 'some purpose'.
- Have an awareness of the impact that Design and Technology has on our lives and the lives of future generations.
